BANKING – CHURN DATA ANALYSIS

TOOL USED : EXCEL

BY G.MOHAMMED SAJJAD HUSSAIN

INTRODUCTION

- This Dataset consists of 10,000 Bank customers data like customer ID, CreditScore, Geography, Gender, Age, Tenure, Balance, no. of Products, HasCrCard, IsActiveMember, Estimated Salary, Exited
- In this Dataset Value 0 Means No and 1 Means Yes
- Here I used this Dataset to Analyze the number of People who had Exited From this Bank and what Could be the Reason behind it and to provide solutions for the Problems that I Encountered
- Here I Used Pivot Table and Pivot Charts to Analyze this Dataset
- Here I used some Formulas to Find KPI’s in this Dataset and some Slicers are used to make the Dashboard Interactive

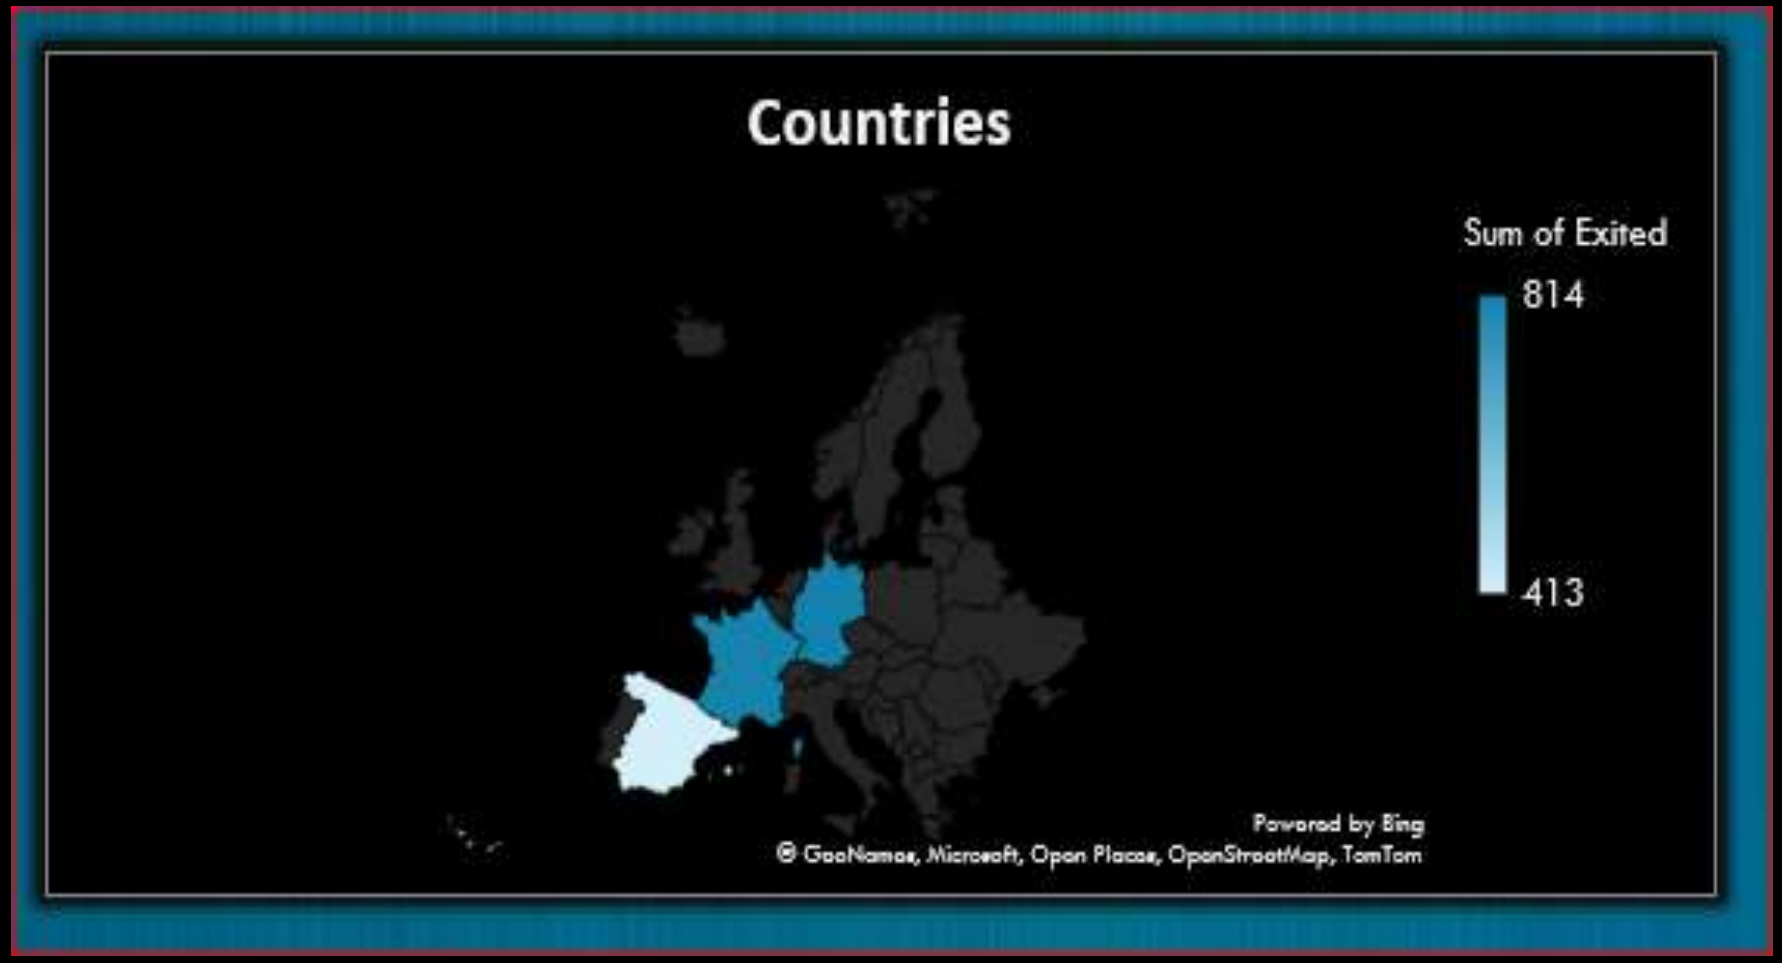

KEY FINDINGS

- Overall 2038 customers out of 10,000 customers have Exited from this bank which is 20.38% and female customers among this is 1139 customers which is 55.88% in this Dataset
- Customers who exited from this bank which is 500 out of 2038 made sure that there Account balance is 0. This is certainly an Indication that the customers are about to Leave from the Bank
- In Active Members in the Bank have Left the Bank more Compared to Active Members in the Bank
- Customers with Credit Card Have Left the Bank more compared to the customers who don’t have one

CONCLUSION

- So I Suggest that Bank provides some Schemes to Attract the female customers in this Bank to retain them and bring some new customers
- They should Allocate some new team to Address the customers concern and provide the Information to the concerned team to sort out the problem ASAP
- Customers with Credit Card and High Estimated Salary have left the Bank more. So Bank should be aware of their competitors who may have given them Good % of Interest Rates, Products, Schemes etc and Do try to Re-evaluate and Re-consider where they are missing and what could they Improve and Try to Implement it ASAP
- They should also focus on Advertising and Marketing their Products, Schemes etc, to Maintain their existing customers and to gain more new customers

THANK YOU
